

What is the damage caused by birds? [Analysis and drilldown]

Click on any datapoint or color in any chart to see its distribution and variation across all the visualization aspects in this Dashboard.

What cost is incurred with strikes in various states?

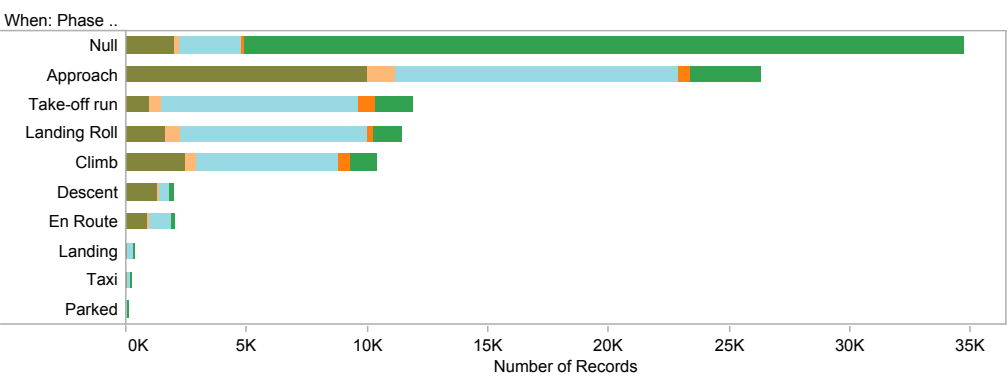

Which birds caused maximum collisions and damage?

How does the collisions by species look?

What is the impact of collision time on the phase of the flight?

Monthly Collisions [to determine if its due to migration of birds]

Which Wildlife Size and at what Altitude collisions are costly?

Which altitude has caused maximum collisions?

| Altitude bin | Count of Number of Records |
|--------------|----------------------------|
| < 1000 ft | 43,901 |
| > 1000 ft | 11,548 |
| Unknown | 43,955 |

Other misc info

| | |
|-------------------------------------|--------|
| Count of Number of Records | 99,404 |
| Count of Number of human fatalities | 1,092 |
| Count of Number of people injured | 107 |
| Avg. Feet above ground | 855 |
| Max. Miles from airport | 1,300 |
